Preamble 3

Registration & Reimbursement Directions 4-5

Course Name	Time	Price	
100% Fall Protection for Construction	00:45	\$35.00	6
Accident Prevention Heavy Construction	00:30	\$35.00	6
Advanced Rough Terrain Forklift for Construction	01:30	\$55.00	6
Alcohol & Substance Abuse	01:00	\$35.00	6
Asbestos Hazards for Construction	00:35	\$35.00	6
Bloodborne Pathogens for Construction	00:40	\$35.00	6
Cold Stress	00:45	\$35.00	7
Competent Person, Excavations for Construction	02:50	\$45.00	7
Competent Person, Fall Protection for Construction	03:50	\$45.00	7
Confined Spaces Awareness for Construction	00:20	\$25.00	7
Introduction to Confined Spaces for Construction	01:15	\$35.00	7
Crane Safety Basics	01:20	\$35.00	8
Electrical Safety and LOTO for General Industry	01:00	\$35.00	8
Electrical Safety for Construction	00:40	\$35.00	8
Emergency Action/Response	01:00	\$35.00	8
Ergonomics Awareness for Construction	00:10	\$25.00	8
Fall Protection Equipment for Construction	00:50	\$35.00	8
Fall Protection for Construction	01:30	\$35.00	9
Fall Prevention and Protection in General Industry	00:45	\$35.00	9
Fire Prevention	01:00	\$35.00	9
Forklift Hazards for Construction	01:00	\$35.00`	9
General Housekeeping on Jobsite Awareness Construction	00:10	\$25.00	9
Hand and Power Tools for Construction	00:50	\$35.00	10
Hazard Communication Advanced for All Industries	01:00	\$35.00	10
How to Read a Safety Data Sheet for All Industries	01:00	\$35.00	10
Ladder Safety Awareness for Construction	00:10	\$25.00	10
Ladder Safety for General Industry	00:45	\$35.00	10
Motorized Mobile Platforms for Construction	00:45	\$35.00	11
MSHA 4-Hour New Miner Site-Entry Training	04:00	\$79.00	11
MSHA 4-Hour New Miner General Training	04:00	\$79.00	11
OSHA 10-Hour Construction	10:00	\$89.00	11
OSHA 30-Hour Construction	30:00	\$189.00	11
Power Tool Safety Awareness for Construction	00:10	\$25.00	12
Power Tool Use and Guarding	00:45	\$35.00	12
PPE Common for Construction	01:00	\$35.00	12
Respirable Crystalline Silica Awareness for Construction	00:30	\$25.00	12
Respirable Crystalline Silica in Construction for the Exposed Worker	01:00	\$45.00	12
Respirable Crystalline Silica Awareness in General Industry	00:30	\$25.00	13
Respirable Crystalline Silica for General Industry	01:10	\$45.00	13
Respirator Basics for All Industries	01:00	\$35.00	13
Rigging Safety for Construction	00:45	\$35.00	13

Course	Time	Price	Page
Safety Trained Supervisor Construction (STSC) Prep	05:00	\$169.00	13
Scaffold Erection Guidelines for Construction	00:30	\$35.00	14
Scaffold User Guidelines for Construction	00:30	\$35.00	14
Signs Signals and Barricades	00:30	\$35.00	14

Trenching and Excavation Awareness R2	00:15	\$25.00	15
Trenching and Excavation for Construction	00:25	\$35.00	15
Welding/Hot Work	00:35	\$35.00	16
Work Zone Traffic Control for Construction	00:45	\$35.00	16
Workplace Violence for General Industry	00:25	\$35.00	16

Preamble

Although it is not the goal to replace in person training at our training centers, the JATC in conjunction with IMPACT and the North Central States District Council recognizes the need to provide remote training to the members of Ironworkers Local 8. The online training courses offered in this training catalog is available as part of our Mandatory Journeyman Training program. Every hour of offered online training will count towards MJT and the cost of every class on completion will be reimbursed to our members through IMPACT. Please make sure to review the login directions. For any additional questions, please contact the Training Office at 414-476-9372.

Ironworker Management Progressive Action Cooperative Trust

Click-Safety IMPACT Midwest Region

When using the portal, there is a 20% discount

1. The Member or Contractor contacts the Coordinator, Local Union, or Regional Director
 - Apprentices must take the standard OSHA classes.
Unless otherwise approved
2. Click-Safety/IMPACT portal. to access the application.
 - The link <http://www.clicksafety.com/impact/>
 - The Authorization Code needed to start the registration process is (IMPACT17502014)
3. The member logs in fills out the proper information
 - Name
 - Address
 - Email
 - Local Union Number etc.
4. User then pays with a **credit card**. "Print a copy your receipt it will be needed for reimbursement."
 - IMPACT **will only** issue the reimbursement to the credit card account used.
 - IMPACT **will only** reimburse for courses successfully completed.
 - IMPACT **will not** reimburse for receipts more than one year old.
5. Click-safety will send a password and link to the email address provided on the application. This information will be needed to login and begin the training.
6. Once a member starts the training FED OSHA limits 6 months to complete.

7. Training can only be performed on PC or Mac operating system.
 - No I Pads, smart phones or handheld devices. Click-Safety does not support Flash.
 - Third party Aps are available that do support Flash if needed.Click Safety Recommends Mobile/Tablet Web Browser PUFFIN. Puffin is available FREE for both Apple iPad/iPhone and Android mobile and tablet devices.
8. All the standard breaks apply (member are limited to 7hrs daily) clock resets at midnight.
9. (Note to applicant) Finish the current module you are working on before pausing to prevent the system from restarting the module at its beginning when resuming.
10. After completing the training, the participant will need to print a copy of the completion certificate.
 - The member needs certificate to prove completion while waiting to receive the hard card.
11. The member submits proper copies to the Local/Business Manager. ○Proof of completion of the course (Copy of the completion Certificate).
 - Proof of payment. (Copy of the Receipt or Redacted Credit Card Statement)
12. The Local submits the documentation with a cover letter approving the reimbursement signed by the Business Manager.
 - Cover letter needs to be on LU letterhead and include the Book number of the member.
 - IMPACT cuts a check sends it to the local Union hall to be given to the member or sends reimbursement directly to the Contractor when applicable.
13. The OSHA hard card is sent to IMPACT regional office and then will be forward it to the coordinator for upload into the IWATS system.
14. Then the hard card can be given to the member.

100% Fall Protection for Construction

INTERMEDIATE/45M

This course is intended to inform students of basic guidelines and methods employed for a 100% fall protection program. It reviews elements of fall hazards, fall hazard evaluation, and fall hazard control. This training references applicable OSHA requirements and other pertinent information. Real life case studies and lessons learned are presented to illustrate the “why” and the “need” for compliance and following OSHA requirements and industrial best practices. [Read more](#)
\$35.00

Accident Prevention for Heavy Construction

INTERMEDIATE/20M

Accident Prevention for Heavy Construction is an intermediate online course that focuses on accident prevention, general safety and health provisions found in the Construction Safety and Health Regulations manual. This course provides the guidelines on accident prevention and ways to help you understand the responsibility for accident prevention at the job site. In addition, this course offers safety regulations and guidelines according to OSHA. [Read more](#)
\$35.00

Advanced Rough Terrain Forklift for Construction

CERTIFICATE/CARD/1HR30M

In this Rough Terrain Forklift online certification prep course, we will prepare you for your C4 Forklift Operation Certificate. You will get in-depth instruction on how to operate a forklift on rougher-than-normal terrains. We will focus on how to maintain your forklift's stability and handling, as well as how to lift loads properly. You will also be taught the general safety rules, proper inspection criteria and how to safely fuel your forklift. [Read more](#)
\$55.00

Alcohol and Substance Abuse for Construction

INTERMEDIATE/1H

This course covers topics associated with the abuse of alcohol and substances, including: Who alcohol and substance abuse affects, an overview of alcohol and substances most often abused, the recognition and effects of alcohol and drugs, what you should do if you recognize use or abuse in your workplace, Codependency issues, sources of help for those who need it and drug testing in the workplace. [Read more](#)
\$35.00

Asbestos Hazards for Construction

INTERMEDIATE/20M

This asbestos awareness course covers asbestos exposure risks, effects, and engineering, administrative and personal protection equipment controls, as well as the relevant OSHA regulations. [Read more](#)
\$35.00

Bloodborne Pathogens for Construction

INTRODUCTORY/10M

Intended for construction employees and employers, this introductory course outlines the common hazards associated with bloodborne pathogens (BBP), as well as best practices for job site safety as related to BBP. [Read more](#)
\$35.00

Cold Stress

INTERMEDIATE/45M

Cold Stress is an intermediate online safety course that focuses on anticipating, recognizing, evaluating, and controlling hazards due to cold stress. In this course, we will teach you the definition of cold stress and how to prevent injuries and illnesses on the job site. **Earn 0.1 CEU!** [Read more](#)
\$35.00

Competent Person, Excavations for Construction

ADVANCED/2H50M

This advanced Competent Person, Excavations online safety course is designed to teach supervisors, managers and owners how to choose a person or persons to act as a competent person with detailed knowledge of excavation safety. OSHA regulations and state requirements will be examined in detail to ensure the right person is selected for the position of a competent person in excavation safety training. [Read more](#)
\$45.00

Competent Person, Fall Protection for Construction

ADVANCED/3H50M

This advanced Competent Person, Fall Protection online safety course is designed to teach construction supervisors, managers and owners how to designate a competent person for fall protection training and to ensure that they are properly qualified to fulfill fall safety on the job site. You will learn about OSHA regulations and what is required by Cal/OSHA and other States to satisfy the designation of a competent person for fall protection. [Read more](#)
\$45.00

Confined Space Awareness for Construction

INTERMEDIATE/20M

In this awareness-level online safety course, you will learn about Confined Space in Construction. Find out how to utilize your existing knowledge on confined spaces while learning about new kinds of safety procedures and changing regulations. Confined spaces include manholes, crawl spaces and tanks that are not designed for continuous occupancy and are difficult to exit in the event of an emergency. Construction workers often perform tasks in confined spaces and these spaces can present physical and atmospheric hazards that can be prevented if addressed prior to entering the space to perform work. [Read more](#)
\$25.00

Introduction to Confined Space in Construction

INTERMEDIATE/1H15M

This Introduction to Confined Space in Construction safety course is a more detailed review of confined spaces for attendants, entrants, supervisors and managers where the student will learn about OSHA's new Confined Space in Construction regulation (29 CFR 1926 Subpart AA) and its fundamental requirements. This course focuses on the basics for recognizing, evaluating and controlling confined spaces. The student will learn about the guidelines set by OSHA for confined spaces and Confined Space Entry (CSE) program procedures that should be set by your company to ensure safety while working at the job site. **Earn 0.1 CEU** [Read more](#)
\$35.00

Crane Safety Basics for Construction

INTERMEDIATE 4 H

For crane operators and other employees on construction job sites, this intermediate-level training course emphasizes the basics of crane safety. It covers general requirements for operation, inspection, signaling, and more in accordance with OSHA regulations. [Read more](#)
\$35.00

Electrical Safety and LOTO for General Industry

INTERMEDIATE 4 H

Designed for general industry employees and employers, this intermediate-level course covers the basics of electrical safety, best practices for lockout/tagout (LOTO), and OSHA's standards and regulations for general industry workplaces. [Read more](#)
\$35.00

Electrical Safety for Construction

INTERMEDIATE 40 M

This intermediate Electrical Safety online course teaches electrical safety concepts including the hazard of electric shock and 3 electrical hazard controls. This course explains electrocution and mild electric shock and what they can do to the human body. The three factors determining how severe an electrical hazard is include the amount of current (amps), the current's path through the body and duration of contact. The goal of this online safety course is to reduce or eliminate situations where harmful electric current could travel through your body. [Read more](#)
\$35.00

Emergency Action/Response for Construction

INTERMEDIATE 4 H

Emergency Action/Response for Construction is an intermediate online safety course that focuses on how to anticipate emergency response events, which may include: spills, releases or potential releases of hazardous substances. It is important to be able to recognize and evaluate emergency response hazards. This course covers controlling actions, which is vital in preventing or minimizing exposure, illness, injury or environmental damage. [Read more](#)
\$35.00

Ergonomics Awareness for Construction

INTRODUCTORY 40 M

In this introductory online course, we will cover Ergonomics safety according to Federal OSHA standards. This Ergonomics Awareness course focuses on prevention of injury by "fitting the job to the worker". By using the techniques in this ergonomics course, you will understand how to prevent injury from happening. [Read more](#)
\$25.00

Fall Protection Equipment for Construction

INTERMEDIATE 60 M

Fall Protection Equipment is an intermediate online safety course that focuses on the selection, inspection and maintenance of fall protection equipment. This course discusses how to conduct a proper fall protection equipment inspection. In addition, you will be given guidelines and methods to follow according to OSHA standards. [Read more](#)
\$35.00

Fall Protection for Construction

INTERMEDIATE 4 HR 20M

Designed for construction workers, supervisors, and managers, this intermediate-level course offers essential fall protection training and prevention information. It covers common fall hazards, evaluating and controlling risks, and more. [Read more](#)

\$35.00

Fall Prevention & Protection in General Industry

INTERMEDIATE 45M

With this Fall Prevention and Protection online course, you will be informed of the OSHA's rules and regulations with regards to Fall Prevention and Protection in General Industry and way to protection against and prevent fall hazards in the workplace. **Includes new OSHA Subpart D Final Rule information! Earn 0.1 CEU!**

[Read more](#)

\$35.00

Fire Prevention for Construction

INTERMEDIATE 3.5H

This intermediate Fire Prevention for Construction online course is designed to help you recognize and correct construction-related fire hazards. This course will help you discover your own job site's pre-plan emergency response for fires. [Read more](#)

\$35.00

Forklift Hazards for Construction

INTERMEDIATE 4.5H

Forklift Hazards is an intermediate online safety course where you will learn the basic rules for safely operating a forklift. This online course teaches you how to establish a standard checklist for ensuring consistency in forklift safety practices. In addition, we will cover the essential tasks forklift operators should observe, in accordance with OSHA standards. [Read more](#)

\$35.00

General Housekeeping on the Jobsite Awareness for Construction

INTRODUCTORY 40M

In this introductory online safety course, you will learn General Housekeeping on the Job Site, according to Federal OSHA standards. This training focuses on the need for good housekeeping to prevent injury that can lead to, in some cases, crippling, paralyzing injuries and even death. Since housekeeping is controlled by the employee, housekeeping accidents are preventable by you. [Read more](#)

\$25.00

Hand and Power Tools for Construction

INTERMEDIATE LEVEL

Hand and Power Tools is an intermediate online safety course on how to handle power tools of all types in a safe manner on the job site. You will be informed of OSHA's hand and power tools regulations for avoiding accidents and preventing injuries. In addition, you will be provided with types of mechanical hazards, types of tools and precautionary measures to ensure your understanding of tool safety. [Read more](#)
\$35.00

Hazard Communication Advanced for All Industries

ADVANCED LEVEL

The advanced Hazard Communication Awareness online safety course covers the essential elements of OSHA's Hazard Communication (often referred to as HazCom) Standard as found in 29 CFR 1910.1200. This course will familiarize you with the essential elements of OSHA's Hazard Communication Standard (HCS). **UPDATED WITH GHS! CEU: 0.1** [Read more](#)
\$35.00

How to Read an Safety Data Sheet for All Industries

INTERMEDIATE LEVEL

No matter what industry they work in, workforce members should receive Safety Data Sheet (SDS) training to help them properly evaluate and safely use hazardous chemicals through this intermediate-level course. [Read more](#)
\$35.00

Ladder Safety Awareness for Construction

INTRODUCTORY LEVEL

This introductory Ladder Safety Awareness for Construction online course will teach you how to correctly and properly use a ladder on a construction site and review the capabilities and limitations of ladders. We will also cover safe work practices and techniques for accident prevention. [Read more](#)
\$25.00

Ladder Safety for General Industry

INTERMEDIATE LEVEL

Ladder Safety Training is an intermediate online course on ladder safety and the hazards associated with ladders for the General Industry sector. This ladder safety course focuses on prevention of injury by providing you with training and information on ladder hazards and we'll also examine the statistics of injuries from ladder falls. This course covers OSHA's ladder safety requirements from 29 CFR 1910.25, 1910.26, 1910.27. [Read more](#)
\$35.00

Motorized Mobile Platforms for Construction

CERTIFICATE/CARD15M

In this intermediate Motorized Mobile Platforms for Construction online safety course, we will teach you about safeguards for mobile operations and different platforms, according to Federal OSHA standards. This Motorized Mobile Platforms/Aerial Lifts course focuses on prevention of injury by providing up-to-date understanding of the equipment, systems and procedures used in mobile operations. [Read more](#)
\$35.00

MSHA 4-Hour New Miner Site Entry Training

CERTIFICATE/CARD4H

Part 46 of Mine Safety and Health Administration (MSHA) regulations requires that mine operators and/or independent contractors provide no less than 4 hours of training to new miners before they enter a mine site. **MSHA 4-Hour New Miner Site Entry Training** will provide the basics of staying safe and healthy around some common mine hazards, as well as other important information that all new miners should know, like miner's rights and responsibilities, and the roles and responsibilities of supervisors and miner's representatives. **Earn 0.4 CEUs!** [Read more](#)
\$79.00

MSHA 4-Hour New Miner General Training

CERTIFICATE/CARD4H

Part 2 of ClickSafety's new miner training adds to the subjects learned in Part 1. Part 1 provided the minimum level of training for beginning work at a mine site, including an introduction to the mine environment, instruction on recognizing and avoiding hazards, a review of basic emergency procedures, and some safety and health fundamentals on tasks a new miner may be assigned. Part 2 further discusses emergency procedures, and provides a review of first aid methods, as well as self-rescue and respiratory devices. New Miner Training, Part 2 will also discuss some of the hazards found at a mine site, such as the health hazards of silica dust, and the dangers and controls of welding and cutting, confined spaces, hazardous energies, and moving machine parts [Read more](#)
\$79.00

OSHA 10-Hour Construction

CERTIFICATE/CARD10H

OSHA 10-Hour Construction is a part of an online OSHA outreach program that results in a valid DOL/OSHA 10-Hour Card. This OSHA10 online training course teaches recognition, avoidance, abatement and prevention of safety and health hazards in workplaces. This course also provides information regarding workers' rights, employer responsibilities and how to file a complaint. It was also designed to help individuals stay up-to-date with their OSHA safety requirements. **Earn 1.0 CEU!** [Read more](#)
\$89.00

OSHA 30-Hour Construction

CERTIFICATE/CARD30H

OSHA 30-Hour Construction is an OSHA-Authorized online course featuring the required steps for completing OSHA Outreach training and receiving an OSHA 30 Card. This online training covers everything from Electrical Hazard Safety to Fall Protection. ClickSafety's OSHA 30-Hour Construction course is a proven way to receive a valid OSHA 30-Hour Card and achieve the safety level required by your company for work in the construction industry. **CEU: 3.0** [Read more](#)
\$189.00

Power Tool Safety Awareness for Construction

INTRODUCTORY/10M

Power Tool Safety Awareness for Construction is an introductory online course that teaches hand and power tool safety, types of power tools, dangers, and uses and limitations. Power tools can cause injuries and accidents, which means hand power tool safety is an important concern when working. You will be informed of PPE and OSHA's safety regulations regarding the use of power tools. [Read more](#)
\$25.00

Power Tool Use and Guarding for Construction

INTERMEDIATE/45M

Power Tool Use and Guarding for Construction is an intermediate online safety course. You can expect to learn hand and power tool safety procedures, with reference to applicable OSHA, ANSI and NIOSH requirements. You will review the proper use of various hand and power tools, as well as case studies highlighting their hazards and proper precautionary measures. You will also be shown best practices for ensuring safe working conditions in this online experience. [Read more](#)
\$35.00

PPE Common for Construction

INTERMEDIATE/1H

Personal Protective Equipment (PPE), Common is an intermediate online safety course that focuses on the types of personal protective equipment you can use to protect yourself from construction hazards and how to avoid injury in the workplace. You will be informed of OSHA's regulations regarding common personal protective equipment. In addition, you will be familiarized with the correct equipment to use for the head, eyes and face, arm and hand, and foot and leg protection. [Read more](#)
\$35.00

Respirable Crystalline Silica Awareness for Construction

INTRODUCTORY/30M

In this introductory online safety course, you will learn about the basics of Silica and Respirable Crystalline Silica Dust encountered during construction activities. **Earn 0.1 CEU!** [Read more](#)
\$25.00

Respirable Crystalline Silica in Construction for the Exposed Worker

INTERMEDIATE/1H

This course entitled "Respirable Crystalline Silica in Construction for the Exposed Worker" is designed to inform the student of the essential elements of OSHA's new Respirable Crystalline Silica standard found in 29 CFR 1926.1153. **Earn 0.1 CEU!**
[Read more](#)
\$45.00

Respirable Crystalline Silica Awareness in General Industry

INTRODUCTORY/30.M

In this introductory online safety course, you will learn about the basics of Silica Dust, Respirable Crystalline Silica Dust and OSHA's new Respirable Crystalline Silica standard for employers and employees in general industry and the maritime industry. **Earn 0.1 CEU!**

[Read more](#)

\$25.00

Respirable Crystalline Silica for General Industry

INTERMEDIATE/45.M

In this intermediate online safety course, students will learn about the basics of Silica Dust and Respirable Crystalline Silica Dust encountered during general industrial activities. **Earn 0.1**

CEU! [Read more](#)

\$45.00

Respirator Basics for All Industries

INTERMEDIATE/30.M

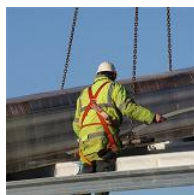

This intermediate level course provides awareness training and background information on respiratory protection, intended for employers and respiratory protection administrators, as well as for anyone who supervises or manages those who must wear a respirator. **Earn 0.1**

CEU! [Read more](#)

\$35.00

Rigging Safety for Construction

INTERMEDIATE/45.M

This intermediate online safety course reviews Rigging safety and covers basic rigging terminology, practices and shows you how to avoid a rigging failure or accident. This course will not go into sufficient detail to provide you with the training to achieve Competent Person status. However, it will provide understanding of basic rigging terminology and rigging practices so that you can be somewhat confident when observing rigging operations in the field. [Read more](#)

\$35.00

STSC Certification Exam Preparation

CERTIFICATE/CARD/3.H

ClickSafety's Safety Trained Supervisor Construction® (STSC) Certification Exam Preparation Course helps participants successfully earn their certification. To learn more, visit us online. [Read more](#)

\$169.00

Scaffold Erection Guidelines for Construction

INTERMEDIATE 20.M

This scaffold erection training course takes just 30 minutes to complete and is packed with pertinent job site safety topics that all construction employees and employers must understand. [Read more](#)

\$35.00

Scaffold User Guidelines for Construction

INTERMEDIATE 40.M

Scaffold User Guidelines is an intermediate online safety course on the proper use of a scaffold. Scaffolds are important when working above ground on a construction job site, and as with ladders, it is very important that they are set up and used correctly. Specific hazards are covered in this course so that you will be aware of dangers of working with or around a scaffold. Scissor lifts are briefly covered in this course. **0.1 CEU** [Read more](#)

\$35.00

Signs, Signals and Barricades for Construction

INTERMEDIATE 30.M

Signs, Signals and Barricades for Construction is an intermediate online safety course that focuses on signs, signals and barricade safety. This course covers the basic requirements for signs, signals and barricades as specified by OSHA regulations. By taking this course, you will be familiarized with the common traffic signs found during construction operations. [Read more](#)

\$35.00

Slips, Trips and Falls in Construction

INTERMEDIATE 30.M

Falls are the leading cause of injury and fatality in the workplace. This intermediate Slips, Trips and Falls online safety course focuses on prevention of injury by teaching you the common exposures that lead to workplace accidents. This course offers steps for planning, communicating and educating for success in creating a safe work environment, which is the key to preventing accidents and injuries. **0.1 CEU** [Read more](#)

\$35.00

Stairways and Ladders for Construction

INTERMEDIATE 45.M

Stairways and Ladders for Construction is an intermediate online safety course that focuses on ladder safety according to OSHA regulations. This course defines industry terms and explains stairway safety regulations. You will be provided with case studies in order to learn real life situations. In addition, you will be informed of the necessary tools to follow safe practices while using ladders and stairways. [Read more](#)

\$35.00

Subpart C: Construction General Safety

INTERMEDIATE 1.5 H

This intermediate Subpart C: Construction online safety course will provide you with information from the general safety and health provisions that are found in OSHA's Construction Safety and Health Regulations, Subpart C. This course covers first aid, CPR, fire prevention, fire protection, housekeeping, important definitions, emergency access, emergency egress and emergency action plans. [Read more](#)

\$35.00

Subpart R Steel Erection for Construction

INTERMEDIATE 1.5 H

Subpart R Steel Erection for Construction is an online safety course that focuses on requirements covered by the OSHA construction safety standards on Steel Erection and Subpart R. You will learn the current occupational safety and health information that is important to understand concerning steel erection. Remember that this OSHA Subpart R course is not a substitute for specific, hands-on training and information. [Read more](#)

\$35.00

Trenching and Excavation Practical Applications for Construction

INTERMEDIATE 1.5 H

This online safety course will cover basic applications of the requirements found in OSHA Subpart P of the Safety and Health Regulations for Construction, CFR 1926. Some of the requirements presented in this course relate to sloping, benching, shoring and alternative protective methods. Interpretation and the use of shoring tables will also be discussed. [Read more](#)

\$35.00

Trenching and Excavation Awareness R2

INTRODUCTORY 1.5 H

Trenching and Excavation Awareness is an introductory online safety course where you can expect to learn basic trench safety guidelines, as well as those put in place by OSHA Trench Safety regulators. You will be informed of basic preventive measures to ensure safety on the job site while trenching and excavating. [Read more](#)

\$25.00

Trenching and Excavation for Construction

INTERMEDIATE 2.5 H

Designed for construction superintendents, foremen, and project managers, this training course focuses on the nuances of trenching and excavation for construction, as well as how to stay safe on the job site during these activities. [Read more](#)

\$35.00

Welding/Hot Work for Construction

INTERMEDIATE 2.5 M

This intermediate Welding/Hot Work for Construction online safety course will familiarize you with the hazards, safe work practices and control techniques of welding operations to enable you to do your job safely. This course follows OSHA's welding regulations and safe work practices in welding. [Read more](#)

\$35.00

Work Zone Traffic Control for Construction

INTERMEDIATE 4.5 M

Designed for road construction workers, this intermediate-level online course prepares students to maintain a safe and smooth flow of traffic on or near construction job sites. Participants will gain familiarity with traffic control plans and devices, use of personal protective equipment, emergency response actions, and more. [Read more](#)

\$35.00

Workplace Violence for General Industry

INTERMEDIATE 2.0 M

Violence is a serious safety and health hazard in many workplaces. This intermediate online safety course focuses on workplace violence awareness in order to anticipate and avoid those dangers. We will teach you that having a timely and appropriate response can prevent a violent situation escalating, resulting in injury or death. [Read more](#)

\$35.00
